

TRENDS IN LOGIC XVII: Traditional and new perspectives on deontic logic and agency modeling

Lublin (Poland), September 12–15 2017

The conference is organized by the Department of the Foundations of Computer Science at the Faculty of Philosophy of the John Paul II Catholic University of Lublin, in co-operation with the journal *Studia Logica*.

We call for relevant contributions applying the different approaches to:

- deontic logic,
- normative aspects of action theory,
- formal ethics,
- legal theory,
- handling norms in computer systems.

A special session on obligations derived from permissions, related to the a special issue of *Studia Logica*, will be a part of the conference.

Publication

Authors are encouraged to submit papers presented at Trends in Logic XVII to *Studia Logica* journal, where they will be a subject of full reviewing process.
